Innovation with **WOW**³

SLIMPANEL + FLATPANEL

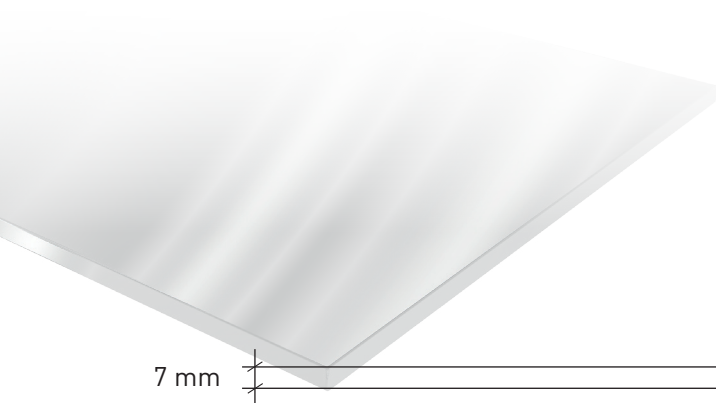

- incredibly flat!
- amazing brightness!
- undreamt flexible!

WOW: incredibly flat!

FlatPanel

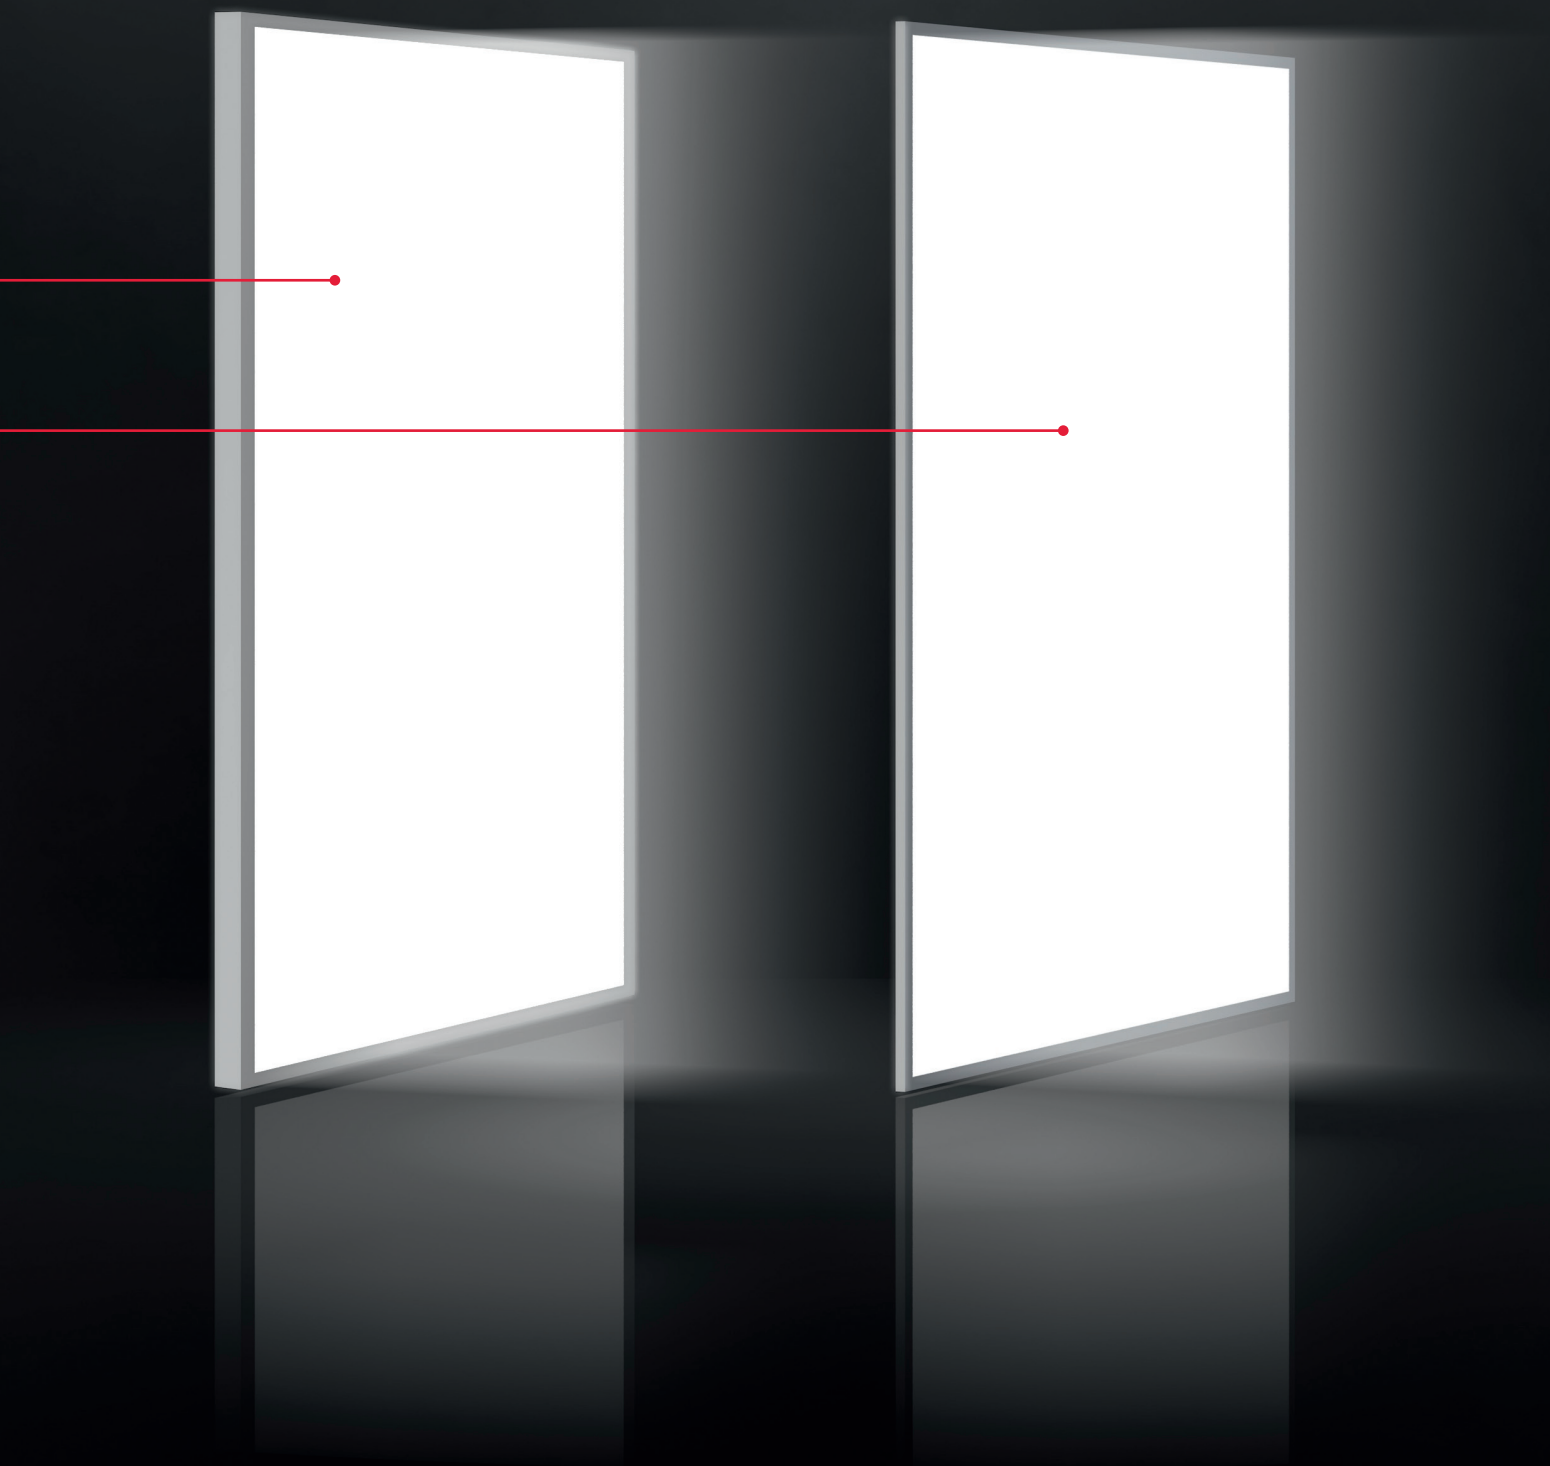

SlimPanel

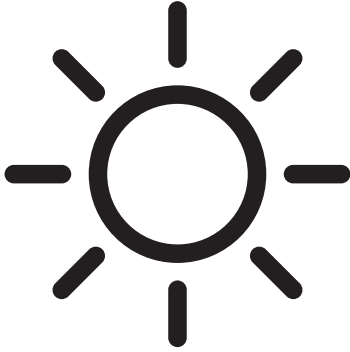

No thicker than two paper tissues!

Our SlimPanel is so unbelievably flat that there are virtually no limits on its possible uses. It is equally suitable as a shelf base or as a backlit rear panel. Its uniformly bright light effectively accentuates certain features, while creating an evocative ambience: Ideal for product displays and presentations.

Thanks to the SlimPanel's correspondingly slimline profile of just 7 mm in height and its maximum surface area of 1,2 x 2 m (Flat Panel: 14,5 mm high, maximum surface area 1,2 x 2 m), no valuable space is wasted. SlimPanel and FlatPanel can be used virtually anywhere: Exhibition stands and shopfitting, interior design, the hospitality sector, visual merchandising.

WOW: amazing brightness!

	SlimPanel	FlatPanel
Format	up to 1200 x 2000 mm	up to 1200 x 2000 mm
Frame	aluminium sheet taped	aluminium
Frame exchangeable	no	yes
Depth	7 mm	14,5 mm
Light input	1 or 2 sides possible	1 or 2 sides possible
RGB colour change	yes (9 mm depth)	yes
maintenance free	yes	yes
Light color	5.400 - 6.500 Kelvin*	5.400 - 6.500 Kelvin*
Power per meter	19,2 Watt	28,8 Watt

* other light color on request

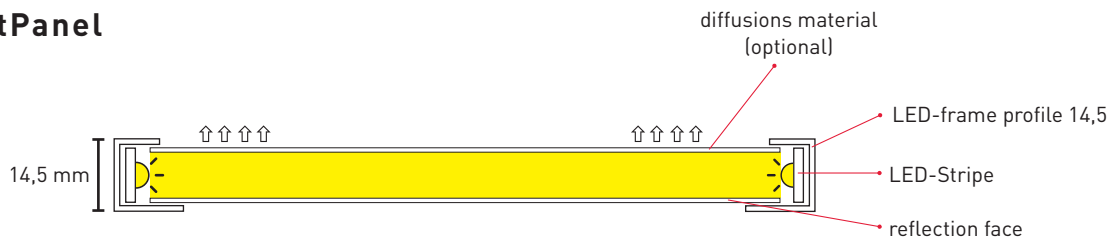

* other formats (FlatPanel) on request

Brighter than ever before!

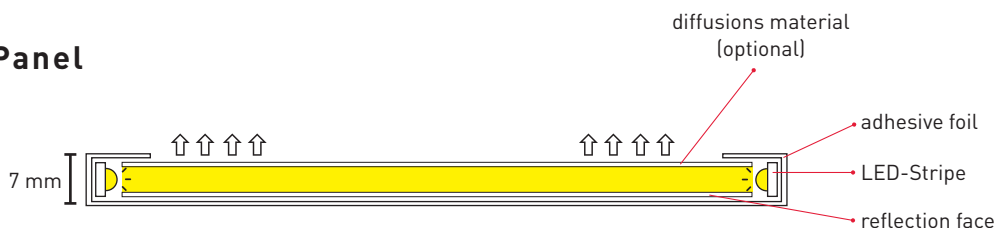

New lighting technology allows both FlatPanel and SlimPanel to create a radiant brightness. We have managed to come up with a system that supplies totally uniform light over an entire surface. This creates clearly demarcated areas of light that have a magical effect on the observer. Every item lit up in this way automatically stands out to the maximum.

Our top-quality LED lighting is fully compatible with dimmer switches, and highly atmospheric effects can be created by using the variable colour control available in RGB mode.

FlatPanel

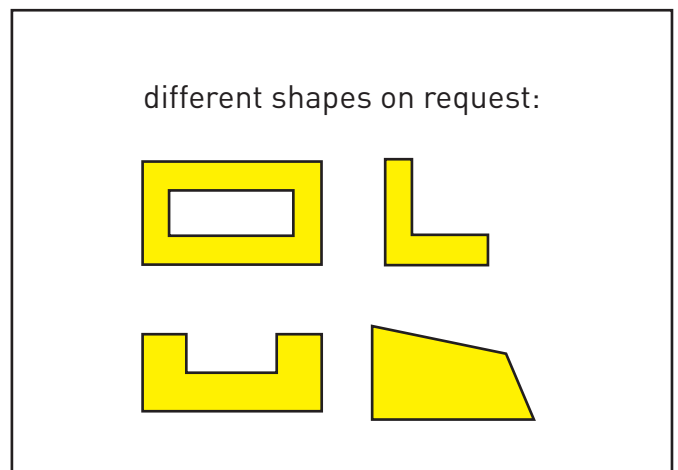

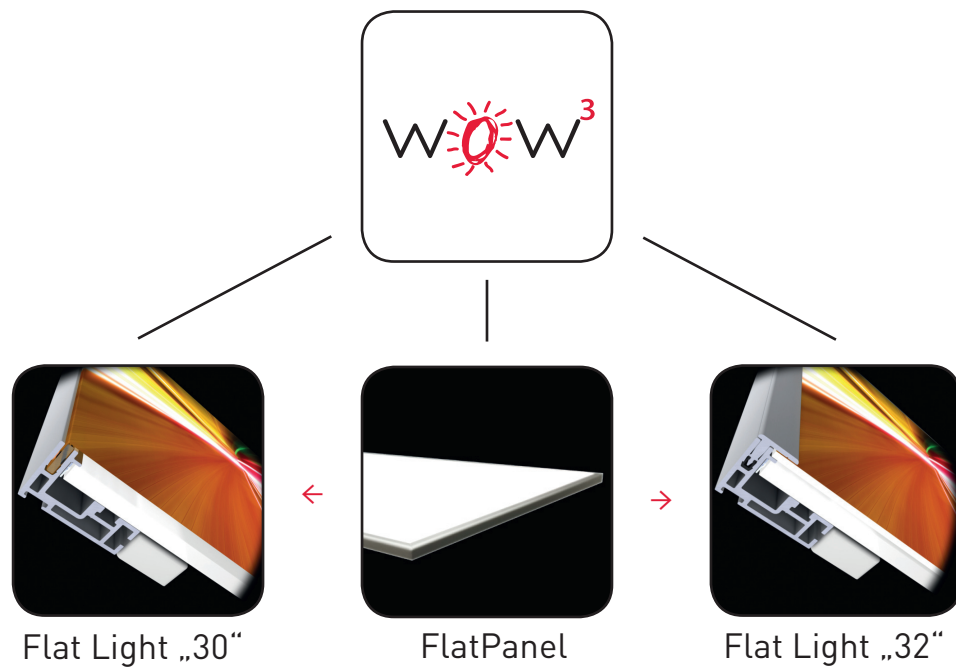

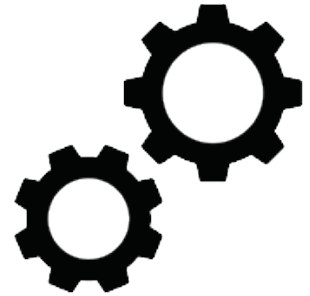

SlimPanel

WOW: technically simple!

Technology that excites!

Installation depth of just 7 mm or 14,5 mm and especially bright.
Illumination or backlighting for surfaces that previously lacked space.
Both lighting configurations are also fully compatible with various frame profiles.

WOW: undreamt flexible!

Flexible and versatile!

FlatPanel und SlimPanel offer planners and designers a full range of attractive possibilities - at any time, as the panels concerned easily fit to existing items, allowing current systems to be modified without difficulty.

Just a few of the possibilities:

- as a flat image
- as the base of a shelf
- as the back of a shelf
- as the front of a piece of furniture
- as a kitchen nook
- as a presentation support
- as a display for a trade fair stand
- as design illumination
